Notes:

- (1) Schedule 3 Standard criteria listed in the MECP Air Contaminants Benchmarks (ACB) List: Standards, Guidelines, and Screening Levels for Assessing POI Concentrations of Air Contaminants dated April 2018.
- (2) Compound does not have criteria listed in the MECP ACB List and cannot be screened as being emitted as negligible. A maximum ground level concentration request has been included in the ECA application.
- (3) Iron emissions from welding are in the form of ferric oxide, therefore criteria for ferric (iron) oxide is used.
- B1 - Benchmark 1 - Exceedance of a Benchmark 1 concentration triggers specific actions under the Regulation.
- B2 - Benchmark 2 - Exceedance of a Benchmark 2 concentration triggers a toxicological assessment to determine the likelihood of adverse effect.
